Iowa Core Curriculum Implementation Planning

Each school district and accredited non-public school in Iowa is required to develop a written plan to describe their implementation of the Iowa Core Curriculum. This document provides a process to facilitate planning and a protocol for meeting the requirements to develop an implementation plan. The Iowa Core Curriculum Implementation Planning Protocol is provided as guidance for use by school Leadership Teams. Leadership Teams are encouraged to engage teachers, administrators, and other stakeholders in an ongoing process that begins with preliminary dialogue, analysis of data, coordination of resources, and initial examination of content, instruction, and assessment. This initial work leads to continued in-depth dialogue about alignment of content, instruction and assessment, improved teaching practices, improved systems of support, and increased student engagement.

The Iowa Core Curriculum Vision

Each and every K-12 student will learn the Essential Concepts and Skill Sets identified in the Iowa Core Curriculum for life in the 21st century.

- Each K-12 educator will embed the Essential Concepts and Skill Sets in rigorous and relevant instruction informed by ongoing formative assessment.

- Each and every educational leader will support and ensure an aligned system of content, instruction, and assessment, focused on the Iowa Core Curriculum Essential Concepts and Skill Sets.

- The Iowa Department of Education, Area Education Agencies (AEAs), Local Education Agencies (LEAs), and collaborative partners will work together to provide the necessary systems of support to establish and sustain structures as needed for the Essential Concepts and Skill Sets, instruction, and assessment.

Full Implementation of the Iowa Core Curriculum

Districts and accredited non-public schools are encouraged to construct their Iowa Core Curriculum Implementation Plan over an extended period of time. Initial portions of the plan may be completed during the 2008-2009 school year, with remaining portions of the Plan added as the Leadership Team learns more about how to use the processes and protocols provided by the Core Curriculum Network.

Definition of Full Implementation: Full implementation is accomplished when the school or district is able to provide evidence that an ongoing process is in place to ensure that each and every student is learning the Essential Concepts and Skill Sets of the Iowa Core Curriculum. A school that has fully implemented the Iowa Core Curriculum is engaged in an ongoing process of data gathering and analysis, decision making, identifying actions, and assessing impact around alignment and professional development focused on content, instruction, and assessment. The school is fully engaged in a continuous improvement process that specifically targets improved student learning and performance.
Legislated Deadlines

District and accredited nonpublic schools must:

1. Respond to all outcomes and targets of the implementation plan
   - Due July 1, 2010, for grades 9-12
   - Due July 1, 2012, for grades K-8

2. Complete an initial alignment of local content with Core Curriculum Essential Concepts and Skill Sets in Literacy, Mathematics, Science, Social Studies, and 21st Century Skills (Civic Literacy, Health Literacy, Financial Literacy, Technology Literacy, and Employability Skills) and steps to address any gaps
   - Due July 1, 2012, for grades 9-12
   - Due 2013-2014, for grades K-8

3. Complete initial analysis of alignment of content, instruction, assessment, and steps to address gaps
   - Due July 1, 2012, for 9-12
   - Due July 1, 2014, for K-8

4. Complete initial analysis of professional development needs in the areas of instruction and assessment and integrate into the District Professional Development Plans (following CSIP procedures)
   - Due July 1, 2012, for 9-12
   - Due 2013-2014, for K-8

Technical Assistance to Support Districts and Schools

The Iowa Department of Education and the AEAs are collaborating to provide an integrated system of supports to facilitate local districts and schools to engage in a continuous planning process to successfully implement the Iowa Core Curriculum. The Iowa Core Curriculum Network will work with each district to help local teams learn about the Core Curriculum and build their own picture of how they will go about implementing each outcome of the Core Curriculum.

Materials and processes developed will be continuously revised based on current knowledge and critical feedback from constituents. It is important that AEAs and districts provide such feedback, as it is intended to be a dynamic, fluid process that changes over time as new tools, processes and technical assistance are developed to best meet the needs of Iowa’s children and youth.
The Iowa Core Curriculum Outcomes

There are six outcomes in the Implementation Plan, that when fully implemented will establish:

- An integrated approach to address the systems-level needs of students and educators through the full engagement and focused actions of **Leadership**, **Schools** and support agencies, and the **Community**. The outer circle on the graphic represents the interaction among these three components and the various systems, processes, and initiatives critical in supporting the work of teaching and learning.

- An aligned system of **Content**, **Instruction**, and **Assessment**, focused on the Iowa Core Curriculum Essential Concepts and Skill Sets. The inner circle focuses attention on:
  - What to teach (Content)
  - How to teach (Instruction)
  - How to determine whether students are learning important content and skills and how to help students to keep track of their own progress (Assessment)

The outcomes are listed below with statements that describe the “theory of action” of how these outcomes will accomplish the intended results.

**Leadership**

**Outcome 1:** School leaders build and sustain system capacity to implement the Iowa Core Curriculum.

If leadership actions of administrators, teachers, and the school board are focused and committed to providing the expertise, guidance, and resources needed to build capacity and support teaching and learning, then the implementation of the Iowa Core Curriculum will result in increased student learning and performance.

**Community**

**Outcome 2:** Community members and other supporting agencies work together to support the implementation of the Iowa Core Curriculum.

If multiple partners including parents, school boards, business and industry, supporting agencies, and other community entities are interdependent, then schools will function as an integrated system to provide a coordinated approach, consistent communication, additional opportunities for learning, and the ongoing supports needed for students to be successful.

**Schools**

**Outcome 3:** A continuous improvement process to improve teaching and learning is used at the district and school level.
If the Iowa Core Curriculum and related school improvement processes function as ongoing continuous improvement processes based on data, then the system will constantly adjust and improve to yield positive outcomes for all students.

**Content – Instruction - Assessment**

**Outcome 4:** District leaders and other educators monitor and use data to increase the degree of alignment of each and every student’s enacted curriculum and other relevant educational opportunities to the Iowa Core Curriculum.

If district leaders (administrators, teachers, and the school board) and other educators monitor and increase the degree of alignment among the intended, enacted, and assessed curriculum, then the quality of instruction will improve and student learning and performance will increase.

**Outcome 5:** Educators engage in professional development focused on implementing Characteristics of Effective Instruction and demonstrate understanding of Essential Concepts and Skill Sets.

If professional development is based on the Iowa Professional Development Model and focused on improved content, instruction, and assessment practices and educators fully implement what they learn, then student learning and performance will increase. (For a list of the Characteristics of Effective Instruction see page 16.)

**Outcome 6:** Educators implement effective instructional practices to ensure high levels of learning for each and every student.

If content is challenging and relevant and teachers routinely deliver instruction that demonstrates the Characteristics of Effective Instruction, then student learning and performance will increase.

**The Iowa Core Curriculum Implementation Planning Protocol**

The planning protocol on the following pages includes the outcomes, targets describing what the district/school plans to accomplish, actions to be taken, and indicators of how the actions will be measured. The indicators listed in this document are those that the Department and AEA will use to monitor state-wide progress on implementing the Iowa Core Curriculum. (Indicators will be distributed soon.)

For each outcome, districts/schools are expected to describe in writing how they plan to address the targets. An on-line action plan format will be provided for districts and schools to record their plans for each outcome.

The Iowa Core Curriculum Implementation Plan document and protocol has been reviewed by a variety of constituents including the groups listed below. The input from the teachers, administrators, consultants, university faculty and other stakeholders represented on these groups greatly enhanced the usefulness of these materials.

- The Iowa Core Curriculum Advisory Team (including school districts, AEAs, ISEA, IASB, SAI and higher education)
- The Iowa Core Curriculum Work Teams
- Iowa Core Curriculum AEA Steering Committee
- Iowa Core Curriculum Network
- Mid-continent Research for Education and Learning (McREL)
Implementation Planning Protocol

Leadership

Outcome 1: School leaders build and sustain system capacity to implement the Iowa Core Curriculum.

If leadership actions of administrators, teachers, and the school board are focused and committed to providing the expertise, guidance, and resources needed to build capacity and support teaching and learning, then the implementation of the Iowa Core Curriculum will result in increased student learning and performance.

</table>
Outcome 1: Guiding Questions

The Leadership Team should select those questions that are relevant to their current local context.

Leadership Team:

- Who are the key leaders in your district who should be included in planning? How do you define “leader”?
- Is there a building/district Leadership Team currently in place? If yes, does the existing Leadership Team adequately represent the staff? Community? Stakeholders? Who needs to be added? Are the various teacher assignments and role groups represented?
- What are the roles and responsibilities of the Leadership Team? How will leaders create a sense of urgency and build commitment within the school and community?

Capacity Building:

- What are the leadership behaviors needed to implement the Iowa Core Curriculum? Do administrators implement the Iowa Standards for School Leaders that are linked to the Iowa Core Curriculum? What leadership behaviors should be improved or enhanced?
- How will the district build capacity of the Leadership Team to understand the Iowa Core Curriculum and be able to apply leadership responsibilities? How are leaders supported to meet the Iowa Standards for School Leaders that align with the Iowa Core Curriculum?
- How will teachers be supported to improve their skills needed to lead and support school improvement?

Resources:

- What resources (e.g., funding, time, training materials, community resources, and external consultant support) will be needed to support school staff to learn about the Core Curriculum?
- What resources are needed that might be available through the community? What supports are available through the AEA?

Communication:

- What is the communication plan for all educators? What are the common “talking points” that should be used with teachers, administrators, and other faculty members?
- How will the district’s vision of the Core Curriculum be communicated to all stakeholders?

Implementation Plan:

- What collaborative processes are needed to develop the Implementation Plan?

Outcome 1 aligns with Iowa School Leadership Standards 1, 2, 3, and 4 and Iowa Teaching Standards 1 and 8.
Community

Outcome 2: Community members and other supporting agencies work together to support the implementation of the Iowa Core Curriculum.

If multiple partners including parents, school boards, business and industry, supporting agencies, and other community entities are interdependent, then schools will function as an integrated system to provide a coordinated approach, consistent communication, additional opportunities for learning, and the ongoing supports needed for students to be successful.

<td></td>
<td></td>
<td>2.a.2.</td>
<td>Community members participate in the development and implementation of the Iowa Core Curriculum Implementation Plan.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>2.a.3.</td>
<td>Learning supports are coordinated to support the Iowa Core Curriculum.</td>
</tr>
</tbody>
</table>
Outcome 2: Guiding Questions

The Leadership Team should select those questions that are relevant to their current local context.

Community Understanding:

- What groups exist as part of the school district (e.g., School Board, School Improvement Advisory Committee, Teacher Quality Committee, Parent-Teacher Organization, other parent groups)? Who are the stakeholders from business and industry?
- What are the common “talking points” that should be used with stakeholders? How will the vision be communicated to the community?
- How will the Leadership Team create awareness and build understanding about the Core Curriculum in the community?
- Are the 21st century skills being emphasized at every opportunity?

Implementation Plan:

- What processes will be used to engage identified representatives of the community in developing the Implementation Plan?
- What student/teacher/administrative/parent/community data will various groups study to prepare to develop the plan?
- What is the plan to communicate information about the planning process with all educators and community constituents?

Support Systems:

- What are the decision-making structures that are needed to facilitate collaborative work among supporting systems and organizations?
- What activities, programs, services, initiatives and structures are in place to remove barriers and facilitate student learning and development? What data sources are used for determining needs?
- How will this planning process fit with other district planning processes (CSIP, DINA/SINA, Teacher Quality Committee, etc.?)

Outcome 2 aligns with Iowa School Leadership Standard 4 and Iowa Teaching Standards 1 and 8.
Schools

Outcome 3: A continuous improvement process to improve teaching and learning is used at the district and school level.

If the Iowa Core Curriculum and related school improvement processes function as ongoing continuous improvement processes based on data, then all elements of the system will constantly adjust and improve to yield positive outcomes for all students.

<table>

<td>3.a.1. District Leadership Team completes the Core Curriculum Self Assessment and use resulting data to write implementation plan.</td>
</tr>
<tr>
<td>3.b. Data used to monitor progress of Core Curriculum implementation over time</td>
<td>3.b.1. District Leadership Team completes Core Curriculum Self Assessment yearly and documents progress of Core Curriculum implementation over time.</td>
</tr>
<tr>
<td>3.c. District/school used processes and procedures for engaging stakeholders, setting goals, developing school improvement plans, and integrating various plans</td>
<td>3.c.1. District Leadership Team and others, as appropriate, develop a cycle for document/plan review for the purposes of incorporating elements of the Iowa Core Curriculum and integrating various planning processes.</td>
</tr>
</tbody>
</table>
Outcome 3: Guiding Questions

The Leadership Team should select those questions that are relevant to their current local context.

Data Use:

- What defines our district’s continuous improvement process?
- What additional data will the district collect? What are the specific sources of data for student outcomes and teacher behaviors?
- What is the schedule for reviewing and analyzing data to inform next steps? How will the district ensure that the process for reviewing local alignment is continuous?
- What are the procedures and routines that will sustain implementation?
- How will information gained from the continuous improvement process facilitate teacher and administrator professional growth (evaluation and professional development)?
- What considerations need to be taken to address staff and administrator turnover?

Self Assessment:

- How will the Leadership Team examine implications of student achievement results and the district self-assessment of implementation of the Core Curriculum?
- How will data about the effectiveness of instruction in a classroom be used to identify areas of improvement on an ongoing basis?
- How will this data keep efforts focused on priorities?

Process Integration:

- What procedures and/or routines are already in place to assist in this work? How does this work connect to SINA/DINA, CSIP, AYP, and APR?
- Are the findings related to the continuous improvement of teaching and learning being widely communicated to stakeholders?

Outcome 3 aligns with Iowa School Leadership Standards 1 and Iowa Teaching Standards 1 and 5.
Content – Instruction - Assessment

Outcome 4: District leaders and other educators monitor and use data to increase the degree of alignment of each and every student’s enacted curriculum and other relevant educational opportunities to the Iowa Core Curriculum.

If district leaders (administrators, teachers, and the school board) and other educators monitor and increase the degree of alignment among the intended, enacted, and assessed curriculum, then the quality of instruction will improve and student learning and performance will increase.

<td>Educators address the alignment of instruction to assessment.</td>
</tr>
</tbody>
</table>

*The Iowa Core Curriculum Network will provide alignment processes and tools and prepare Leadership Teams to use them. Districts/schools may wait to begin planning for this outcome until they have learned more about these alignment resources.
Outcome 4: Guiding Questions

The Leadership Team should select those questions that are relevant to their current local context.

Alignment Expertise:

- How will you ensure that all members of the instructional staff are involved in the alignment work?
- How will the Leadership Team implement procedures to describe the enacted curriculum?
- How do you know implementers have the skills/expertise to use the processes and tools?

Alignment Preparation:

- How will all content areas be addressed? What is the schedule for engaging in alignment processes for each area?
- How will you ensure that the enacted curriculum is the assessed curriculum?
- How will the district support individuals (educators, students, parents, etc.) with the change process?
- What are the tools and procedures needed for data collection, storage, analysis, display, reporting, and decision-making for action planning next steps? How will data be shared and with whom? Who will make decisions?
- What are the tools and procedures needed to ensure that students can demonstrate the Essential Concepts and Skill Sets? How will you examine the cognitive demand and relevance of what students are learning?
- What are the tools and procedures needed to ensure that the enacted curriculum is experienced by students? What tools and procedures are already used routinely?

Alignment Implementation:

- How will you engage students in learning and applying 21st century skills?
- How will the Leadership Team facilitate dialogue with educators about the enacted curriculum?
- How will collaborative structures be organized for teachers to engage in dialogue about alignment?
- What is the schedule for engaging in dialogue?

Outcome 4 aligns with Iowa School Leadership Standard 2 and Iowa Teaching Standards 2 and 3.
Outcome 5: Educators engage in professional development focused on implementing Characteristics of Effective Instruction and demonstrate understanding of Essential Concepts and Skill Sets.

If professional development is based on the Iowa Professional Development Model and focused on improved content, instruction, and assessment practices and educators fully implement what they learn, then student learning and performance will increase.

<table>

<tr>
<td>5.b. Effective professional development provided</td>
<td>5.b.1. Educators engage in professional development that contains all elements of effective professional development for student achievement (Iowa Professional Development Model).</td>
</tr>
</tbody>
</table>

*The Iowa Core Curriculum Network will provide instructional review and alignment processes and prepare Leadership Teams to use them. Districts/schools may wait to begin planning for this outcome until they have learned more about the instructional review and alignment resources.
Outcome 5: Guiding Questions

The Leadership Team should select those questions that are relevant to their current local context.

Professional Development Data:

- How will district leaders analyze data from content alignment work and from instructional reviews to revise existing professional development priorities and set new goals for professional development? What are the gaps in professional development offerings needed to prepare staff to implement the Core Curriculum?
- What other sources of student data inform the professional development plans (i.e., achievement data, enrollment, attendance data, drop out rate, student performance data in academic areas, etc.)?
- How will the district determine the level of participation and engagement in professional learning opportunities? How will implementation data be used to inform the design of professional development learning opportunities?
- How do you know the Iowa Core Curriculum is being implemented with fidelity in the building? If professional development is not being implemented as intended, what should be done next?
- What is the current status of district and building-level professional development? How can we use the Iowa Professional Development Profile to improve the professional development and implementation of the Iowa Core Curriculum?

Provision of Professional Development:

- How are all administrators and teachers engaged? What collaborative opportunities are in place in our district?
- What is needed to sustain professional development that builds capacity to deliver the Iowa Core Curriculum? (Some examples of professional development that supports the Characteristics of Effective Instruction and Essential Concepts and Skill Sets include: Every Student Counts, Every Child Reads, Every Learner Inquires, Authentic Intellectual Work, etc.)
- What changes are needed to update or replace the District and Attendance Center Professional Development Plans to ensure that teachers and administrators have needed knowledge and skills?
  - Essential Concepts and Skill Sets including the 21st Century Skills
  - Characteristics of Effective Instruction
  - Leadership to support the Core Curriculum
  - Managing the change process effectively with focus on culture, communication, input, and order
  - Use of data
- What processes are in place to ensure that the Individual Professional Development Plans support the district and attendance center goals for improving instruction and assessment?
- How are mentors supporting new teachers to learn skills related to the Core Curriculum?
- How might technology be used?
- How might the Network support our professional development? What other supports are available? Who will deliver professional development? If external expertise is needed, how will skillful trainers be accessed?

Outcome 5 aligns with Iowa School Leadership Standards 4 and Iowa Teaching Standard 7.
Content – Instruction – Assessment

Outcome 6: Educators implement effective instructional practices to ensure high levels of learning for each and every student.

If content is challenging and relevant and teachers routinely deliver instruction that demonstrates the characteristics of effective instruction, then student learning and performance will increase.

</tr>
</tbody>
</table>

*The Iowa Core Curriculum Network will provide technical assistance on the Characteristics of Effective Instruction. Districts/schools may wait to begin planning for this outcome until they have learned more about the Characteristics of Effective Instruction.
Outcome 6: Guiding Questions

The Leadership Team should select those questions that are relevant to their current local context.

Characteristics of Effective Instruction:

- How will teachers and administrators be engaged in planning the review process?
- How will the district or school ensure that all staff members understand the purposes of the review process, are familiar with tools, and have the skills to use them? How might tools already in use be adapted?
- How will the entire staff be engaged in the review process?
  
  Options 1: If a district uses an existing instructional review process, how will the district ensure that the current review process examines the Characteristics of Effective Instruction and the Essential Concepts and Skill Sets?
  
  Option 2: If a district does not have an instructional review process, how will the district engage in learning opportunities to gain skills in the use of Core Curriculum tools to examine the Characteristics of Effective Instruction and the Essential Concepts and Skill Sets?
  
  Option 3: If a district does not have an instructional review process, what process will the district use to develop an instructional review showing classroom evidence of the Characteristics of Effective Instruction and the Essential Concepts and Skill Sets?

- What leadership actions and supports are in place at district and building level that will contribute to ongoing sustained attention to improving content, pedagogy, and formative assessment practices?
- How will school leaders and teachers establish norms in the workplace to ensure that teachers routinely design and implement instruction focused on developing deep conceptual and procedural understanding, using the Characteristics of Effective Instruction including:
  
  Teaching for Understanding
  Providing Rigorous and Relevant Curriculum
  Teaching for Learner Differences
  Assessment for Learning
  Student-Centered Classrooms

- How will the analysis of alignment data be used to inform professional development plans and inform program decisions? What changes will be needed in the professional development plans to ensure that all staff have the knowledge and skills to implement the Characteristics of Effective Instruction?

Student Engagement

- How can students be involved in decision making about improving learning opportunities and student engagement?
- How will the Instructional Decision Making process help with data gathering, analysis, and decision making? Are assessment processes balanced? How will student work be used as formative assessment and to ensure alignment to the written curriculum?
- How does the Instructional Decision Making process, learning supports, and teaching for learning differences provide differentiation for all students?

Outcome 6 aligns with Iowa School Leadership Standards 2 and Iowa Teaching Standards 4 and 5.
